

Travel Safety Requirements (as of 22APR22)

For the safety of our guests and passengers, AFC Vacations is implementing new on tour requirements. We thank you for your understanding and for doing your part to keep us all traveling safely.

Requirements for Passengers

(Effective for all tours departing March 15, 2022 and after)

Domestic Travel Requirements (United States Tours)

All passengers traveling with AFC Vacations within the United States, regardless of destination or point of origin, must provide proof of full vaccination against COVID-19. Passengers will be asked to show the Tour Manager the following when joining their tour:

- **Proof of Vaccination** against COVID-19. Proof must include the passenger's name & final dose* given at least 14-days before the tour departure date. Proof can be a photocopy or electronic vaccination record document issued by either: (a) the health authority that administered the vaccination (i.e., U.S. CDC's Vaccination Record Card); or (b) the participant's medical provider that administered the vaccination, or (c) approved electronic certification from your county, state or health provider.

Depending upon your destination in the United States, there may be other requirements such booster or testing requirements in certain counties for indoor dining and activities. Guests should monitor these requirements as well. AFC will continue to review and update our requirements as US restrictions are updated.

**At time of printing, a booster shot was not required to meet the definition of fully vaccinated. A final dose was considered those who have received two doses of Pfizer-BioNTech or Moderna vaccine, or those who have received one dose of Johnson & Johnson/Janssen vaccine.*

Vaccination Requirement for International Travel (International Tours including Canada & European River Cruises)

All passengers traveling with AFC Vacations to any country outside of the US regardless of destination or point of origin must provide proof of full vaccination against COVID-19. International destinations have introduced vaccination requirements for indoor experiences like restaurants, attractions, museums, theaters, etc. Even though the entry requirements for that destination may not require vaccination, vaccination will be required to travel on all international tours. At this time, a negative/not detected test result for COVID-19 administered in advance of returning to the United States or proof of recovery within 90 days is also required.

Depending upon your destination, there may be other and additional country-specific and/or airline requirements for testing prior to travel. Guests should monitor these requirements as well. AFC will continue to review and update our requirements as Domestic & International restrictions are updated.

Q & A – Travel Safety Requirements

How will these requirements be verified for a US Tour?

On the first day of the tour, Proof of Vaccination will be verified by the Tour Manager, and a Wellness Survey & Waiver must be completed and given to the Tour Manager.

How will these requirements be verified for an International Tour, Canada or European River Cruise?

On the first day of the tour/cruise, Proof of Vaccination will be verified by the Tour Manager, and a Wellness Survey & Waiver must be completed and given to the Tour Manager.

What does fully vaccinated mean & do I need a booster shot?

At time of printing, fully vaccinated means you are two weeks beyond a final dose having received two doses of Pfizer-BioNTech or Moderna vaccine, or those who have received one dose of a Johnson & Johnson/Janssen vaccine. At time of printing, a booster shot was recommended for those eligible but not required to meet the definition of fully vaccinated.

Are there any exceptions for individuals who cannot take a vaccine or who do not want to be vaccinated?

We are not currently making any standard exceptions to the vaccination policy. Guests who are not vaccinated will not be permitted to travel on U.S. or International Tours in 2022.

What do I need to know about air travel?

Airports and airlines have developed many new policies in response to COVID-19 including, but not limited to requiring a negative COVID-19 test or proof of recovery within 90 days prior to boarding any flight that returns to the U.S. Health screenings during check-in and health declarations are also normal procedure.

Are guests required to wear masks?

We follow destination requirements and local, state, federal, and international mandates. Face masks are now optional unless required by local authorities, airlines, vendors or transportation providers. While mask usage is still recommended, we know that everyone has different comfort levels when it comes to health and safety. All guests must agree to comply with these rules.

What if a guest has symptoms of COVID-19 during the tour?

Fully vaccinated people should still watch for symptoms of COVID-19, especially following an exposure to someone with suspected or confirmed COVID-19. If an individual develops symptoms, he or she should isolate and be clinically evaluated for COVID-19, regardless of vaccination status.

What if a guest tests positive for COVID-19 within 10 days following the tour conclusion?

We encourage guests to contact us should they develop symptoms or test positive for COVID-19 within 10 days following their tour conclusion. There may be contact tracing conducted by AFC. We will alert the other group members of the possible exposure so that they can take all necessary precautions. AFC will attempt to protect the privacy of any individual who tests positive, though contact tracing and notification could result in guests inferring who has tested positive.
